

OUMS Test & Development CHP (Container)

- R&D CHP without gasifier – will be brought to test/development site
- Fueled either by wood gas or agricultural bio gas
- Power 30 kWe, 80 kW heat
- Equipped with enhanced measurement systems
 - Kistler Kibox + Kistler Cockpit software for analyzing and indicating the combustion process
 - Rheonik Coriolis mass flow meter for natural and biogas
 - Eldridge Thermal mass flow meter for wood gas
 - Agilent 490 micro GC gas chromatograph and EcoPhysics CDL 700 analyzer for gaseous fuels and exhaust emissions
